

4. Hotels / Resorts

ICP Summary

Hotels and resorts are a viable healthcare-adjacent expansion vertical, but they require different positioning. The correct offer is not “medical virtual assistant.” The correct offer is remote operational support for guest communication, reservations coordination, pre-arrival workflows, group/event administration, spa/wellness program coordination, back-office HR, and executive/admin support.

Florida’s tourism scale supports this vertical: 143.3 million visitors traveled to Florida in 2025, with domestic visitors accounting for 91.5% of total visitation. ([Florida Governor's Office](#)) VISIT FLORIDA also provides STR hotel reporting across occupancy, ADR, RevPAR, and market-level hotel metrics, which confirms that hospitality performance is tracked granularly across the state. ([visitflorida.org](#))

Best-Fit Hospitality Segments

ICP Tier	Property Type	Profile	Fit Level	Recommended Motion
Hotel A	Independent boutique hotel	20–100 rooms	Selective	Guest messaging / admin support
Hotel B	Independent or regional hotel	100–250 rooms	High	Reservations + back-office support
Resort B	Resort with spa/wellness/events	100–500 rooms	Very High	VWA + guest coordination
Hotel C	Multi-property operator	2–10 properties	High	Centralized admin / reservations team
Hotel D	Branded enterprise hotel group	Corporate-managed	Opportunistic	Longer cycle, procurement-heavy
Vacation rental manager	50+ managed units	High if systems mature	Guest communication / scheduling	

Ideal Customer Profile — Hotels & Resorts

Primary decision-maker: Owner/operator, general manager, rooms division manager, reservations manager, spa director, sales/events manager, HR manager.

Operational pain: Missed guest messages, reservation admin backlog, pre-arrival coordination, group inquiries, event follow-up, spa bookings, staff onboarding paperwork, vendor coordination, post-stay review follow-up.

Remote readiness: Uses PMS/CRM/task systems such as Opera, Cloudbeds, Mews, Stayntouch, Maestro, SevenRooms, Salesforce, HubSpot, Revinate, Zendesk, Kipsu, Canary, Alice/Actabl, or shared inboxes.

Budget maturity: Can compare remote support to local front desk, reservations, coordinator, admin, or HR staff costs.

Primary buyer psychology: Wants improved responsiveness, smoother guest experience, and lower admin load without damaging brand standards.

Role Mapping

H& Jobs Role	Hospitality Use Case	Fit
Virtual Wellness/Hospitality Assistant	Spa/wellness booking, program coordination, guest check-ins, digital resources, engagement tracking	Primary for resort/spa properties
Executive Assistant	GM/owner calendar, meeting notes, vendor coordination, event documentation	High
HR & Payroll Assistant	Staff onboarding, records, payroll prep, leave tracking	High
SDR Adaptation	Group sales outreach, event inquiry follow-up, corporate account prospecting	Conditional
Scheduler / Receptionist Adaptation	Reservation inquiries, guest call routing, appointment booking	Conditional
Legal Assistant / Paralegal	Contract/admin document organization for larger operators only	Optional

The Virtual Wellness/Hospitality Assistant already fits wellness, coaching, lifestyle, session scheduling, engagement tracking, CRM use, digital content distribution, and supportive communication workflows. The Executive Assistant role fits hotel ownership and GM support because it covers calendar/inbox management, meeting documentation, follow-up tracking, vendor coordination, and executive

communication. The SDR role can support hospitality sales only when the property has a defined group/event/corporate outreach process and CRM cadence.

High-Intent Buying Triggers

Trigger	Interpretation
"Guest messages are not answered fast enough"	Guest communication support fit
"We need after-hours coverage"	Remote support fit if escalation rules are clear
"Spa bookings and guest follow-ups are manual"	VWA fit
"Our GM is buried in vendor/admin work"	Executive Assistant fit
"Group/event inquiries are not followed up"	SDR or event admin support fit
"HR paperwork is behind"	HR & Payroll Assistant fit

Hospitality Disqualification Rules

Disqualify or defer hotels/resorts that:

- Expect remote staff to replace physical front desk, housekeeping, maintenance, food/beverage, valet, or security functions.
- Cannot define brand voice, response templates, and escalation rules.
- Need immediate live coverage without training or access setup.
- Refuse to provide PMS/CRM/shared inbox access.
- Have no property-side escalation contact for guest complaints.
- Need multilingual support beyond tested English capability without screening.

Florida Launch Priority — Hospitality

Highest priority regions:

1. Orlando / Central Florida: theme park, family travel, resorts
2. Miami / Miami Beach: luxury, boutique, wellness, nightlife
3. Fort Lauderdale / Palm Beach: resort, business, leisure mix
4. Naples / Sarasota / Fort Myers: luxury, seasonal, wellness-oriented
5. Florida Keys: resort, boutique, high-touch guest experience

6. Tampa Bay / Clearwater / St. Pete: beach, events, business/leisure mix
7. Panhandle: seasonal beach resorts and vacation rental operators
